|       |         | 其他要求      | 符合招标文件第二章“投标人须知”第1.4.1项规定的其他要求                                                                                                          |
| 2.2.3 | 响应性评审标准 | 投标内容      | 符合招标文件第二章“投标人须知”第1.3.1项规定                                                                                                               |
|       |         | 工期        | 投标函中载明的工期符合招标文件第二章“投标人须知”第1.3.2项规定                                                                                                      |
|       |         | 工程质量      | 投标函中载明的质量符合招标文件第二章“投标人须知”第1.3.3项规定                                                                                                      |
|       |         | 投标有效期     | 投标函中承诺的投标有效期符合招标文件第二章“投标人须知”第3.3.1项规定                                                                                                   |
|       |         | 投标担保      | 符合招标文件第二章“投标人须知”第3.4.1项规定；                                                                                                              |
|       |         | 已标价工程量清单  | 符合招标文件第二章“投标人须知”第3.2.2项规定<br>① 投标报价不低于工程成本或者不高于招标文件设定的招标控制价或者招标人设置的投标限价的；② 未改变“招标工程量清单”给出的项目编码、项目名称、项目特征、计量单位和工程量的；③ 未改变招标文件规定的暂估价、暂列金额 |

|       |                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | 投标人在投标文件递交截止时间当日，本次招标中需要的建筑业企业资质动态监管结果不处于不合格状态。承诺书符合投标人须知前附表3.1.1 中要求。 |

  **1. 评标方法**

本次评标采用合理低价法。评标委员会对满足招标文件实质要求的投标文件，按照本章第2.2款规定的评分标准进行打分，并按得分由高到低顺序推荐中标候选人。综合评分相等时，以投标报价低的优先；投标报价也相等的，由招标人自行确定。

**2. 评审标准**

**2.1 评标入围**

- 2.1.1 投标文件存在评标办法前附表评标入围所列情况之一的，不再进行后续评标。
- 2.1.2 当满足评标入围条件的投标文件超过20家时，评标委员会根据评标办法前附表载明的评标入围方法和数量，确定进入后续评标程序入围投标人。

**2.2 初步评审标准**

- 2.2.1 形式评审标准：见评标办法前附表。
- 2.2.2 资格评审标准：见评标办法前附表。
- 2.2.3 响应性评审标准：见评标办法前附表。

**2.3 详细评审**

- 2.3.1 评审因素及分值构成：见评标办法前附表；  
以投标报价为唯一评审因素的，本章中关于投标人市场信用评价的条款不适用。
- 2.3.2 评标基准价计算方法：见评标办法前附表。
- 2.3.3 评分标准
  - (1) 投标报价评分标准：见评标办法前附表；
  - (2) 投标人市场信用评价评分标准：见评标办法前附表；

**3. 评标程序**

**3.1 评标准备**

- 3.1.1 评标委员会成员到达评标现场时应在签到表上签到以证明其出席。
- 3.1.2 评标委员会成员首先推选一名评标委员会负责人，负责评标活动的组织领导工作。
- 3.1.3  
招标人或招标代理机构应向评标委员会提供评标所需的信息和数据。评标委员会负责人应组织评标委员会成员认真研究招标文件，未在招标文件中规定的标准和方法不得作为评标的依据。

### 3.2 评标入围

评标委员会按本章2.1条规定的方法确定进入初步评审的投标人名单。

### 3.3 初步评审

#### 3.3.1 形式性评审

评标委员会根据本章第2.2.1款列出的评审标准，有一项不符合评审标准的，作无效标处理。

#### 3.3.2 资格评审

评标委员会根据本章第2.2.2款列出的评审标准，有一项不符合评审标准的，作无效标处理。

#### 3.3.3 响应性评审

评标委员会根据本章第2.2.3款列出的评审标准，有一项不符合评审标准的，作无效标处理。

3.3.4 投标报价有算术错误的，评标委员会按以下原则对投标报价进行修正，修正的价格经投标人书面确认后具有约束力。投标人不接受修正价格的，评标委员会应当否决其投标。

（1）投标文件中的大写金额与小写金额不一致的，以大写金额为准；

（2）总价金额与依据单价计算出的结果不一致的，以单价金额为准修正总价，但单价金额小数点有明显错误、四舍五入原因的除外；

#### 3.3.5 澄清、说明或补正

在初步评审过程中，评标委员会应当就投标文件中不明确的内容要求投标人进行澄清、说明或补正，澄清、说明或补正按照本章第3.5款的规定进行。

3.3.6 投标人有以下情形之一的，其投标作无效标处理：

（1）第二章“投标人须知”第1.4.3项、第1.4.4项规定的任何一种情形的；

（2）以他人的名义投标、串通投标、以行贿手段谋取中标或者以其他弄虚作假方式投标的；

（3）不同投标人的投标文件出现了评标委员会认为不应当雷同的情况的；

（4）投标人资格条件不符合国家有关规定或招标文件要求的；

（5）明显不符合技术规范、技术标准的要求的；

（6）投标文件载明的货物包装方式、检验标准和方法等不符合招标文件的要求的；

（7）投标文件提出了不能满足招标文件要求或招标人不能接受的工程验收、计量、价款结算和支付办法的；

（8）未按招标文件要求提供电子投标文件，或者投标文件未能解密且按照招标文件明确的投标文件解密失败的补救方案补救不成功的；

(9) 投标文件关键内容模糊、无法辨认的；

(10) 投标文件中提供的证明资料，与各地公共资源交易中心、行政监督部门网站公示的实质内容不一致的；

(11) 投标文件中未提交本单位法定代表人或其委托代理人签署的《投标诚信承诺书》的；

(12) 不同投标人从同一个互联网协议地址上传投标文件的。

(13) 拒不按照评标委员会要求对投标文件进行澄清、说明或者补正的。

### **3.4详细评审**

3.4.1按本章第2.3.2规定的方法确定评标基准价。

3.4.2评标委员会按本章第2.3款规定的量化因素和分值进行打分，并计算出综合评估得分。

(1) 按本章第2.3.3 (1) 目规定的评审因素和分值对投标报价计算出得分A；

(2) 按本章第2.3.3 (2) 目规定的评审因素和分值对投标人市场信用评价计算出得分B。

3.4.3评分分值计算保留小数点后两位，小数点后第三位“四舍五入”。

3.4.4投标人得分=A+B。

### **3.5投标文件的澄清和补正**

3.5.1在评标过程中，评标委员会应当以书面形式要求投标人对所提交的投标文件中不明确的内容进行书面澄清或说明。评标委员会不接受投标人主动提出的澄清、说明或补正。

3.5.2

澄清、说明和补正不得改变投标文件的实质性内容。投标人的书面澄清、说明和补正属于投标文件的组成部分。

3.5.3

评标委员会对投标人提交的澄清、说明或补正有疑问的，可以要求投标人进一步澄清、说明或补正，直至满足评标委员会的要求。

3.5.4

在评标过程中，评标委员会发现投标人的报价明显低于其他投标报价，使得其投标报价可能低于其个别成本的，有可能影响质量或者不能诚信履约的，应当要求其在评标现场合理的时间内提供书面说明并提供相关证明材料。投标人不能合理说明或者不能提供相关证明材料的，评标委员会应当否决其投标。

### **3.6推荐中标候选人**

评标委员会在推荐中标候选人时，应遵照以下原则：

3.6.1评标委员会按照最终得分由高至低的次序排列，推荐1-3名中标候选人。

**3.6.2**如果评标委员会根据本章的规定作无效标处理后，有效投标不足三个，评标委员会应当对是否具有竞争性进行判断：有竞争性的，按有效投标最终得分由高至低的次序推荐中标候选人；缺乏竞争的，评标委员会应当否决全部投标。

**3.6.3** 评标委员会完成评标后，应当向招标人提交评标报告。
